

Convert your organic waste to a

Steady stream of savings.

Marathon's Eco-Safe Digester™

Convert food waste to liquid in an environmentally friendly manner.

The new Eco-Safe Digester is an innovative breakthrough in confronting the growing problem of organic waste processing and disposal. The Eco-Safe Digester uses a highly refined formula of micro-organisms to break down organic waste into liquid that can be safely washed down the drain, enabling the effluent to return to the ecosystem as water. Divert food waste from the landfill and save up to 50% — or more — on hauling costs with Marathon's Eco-Safe Digester.
